Projects

- **APPLICATION FOR ONLINE TO OFFLINE SERVICES**
  A utility android app is designed to service customers on their move to provide locality based services with more user friendly interfaces. The app offers immediate solutions to mechanic service, food service, medical service, electric and electronic services and many other services which is vital in present world as we mainly dependent on tertiary sector. When the user is in need of a service, the app furnishes a list of nearby service providers from which the user can select. Address of service provider are also made available to the user with the help of this app along with review ratings.

Objective

My goal is to become associated with a company where I can utilize my skills and gain further experience while enhancing the company's productivity and reputation.
